

# Langley Research Center Safety Alert

SA-19-90

Date: December 7, 1990

TO: All Facility Safety Heads  
All Facility Coordinators  
All Contractor Safety Representatives

FROM: 429/Safety Manager, Head, Safety Engineering Branch, SSQRD

SUBJECT: Identification of Hazardous Waste in Sanitary Sewer System

Discharge of wastewater into the sanitary sewer system is subject to conditions of the wastewater discharge permit issued to Langley Research Center by the Hampton Roads Sanitation District (HRSD). The permit requires that Langley Research Center notify the HRSD of all hazardous waste being discharged into the sanitary sewer system.

Facility Safety Heads are currently responsible for the identification and handling of hazardous waste generated in their facilities. Materials considered hazardous waste are described in the enclosures. All facility operations are to be reviewed to identify any discharges of these materials. Facility Safety Heads and Contracting Officers for on-site contractors shall complete the form on the reverse side and return it by January 18, 1991, to Mail Stop 429, Environmental Engineering. Written responses, with the signature of the person submitting the response, are required.

If further information is required contact Mr. R. D. Brown at extension 43609.
